RE:Mainframe Application Developer

Dear Hiring Manager,

Please accept this letter as an expression of my interest in the Application Developer position. I am a highly motivated and progress-focused Senior Consultant with a long-standing background in this industry. With a track record of initiative and dependability, I have devised strategic initiatives which I believe will prove valuable to BMO.

With a track record spanning ten years in Mainframe Development, I have cultivated my programming skills to consistently produce meticulously documented, high-quality code that adheres to industry standards and aligns precisely with user requirements. My history includes successfully spearheading and engaging in the development, testing, and rollout of numerous small to mid-sized initiatives, invariably adding substantial value to my previous employers. My capacity to collaborate seamlessly with team members across various departments, coupled with my unwavering attention to detail, has consistently propelled projects to their triumphant conclusion.

My experience equips me with a comprehensive understanding of design and analysis methodologies and a deep-seated familiarity with application development processes. I possess a solid foundation in systems analysis and programming, with a particular focus on optimizing business processes to their fullest potential. These skills underpin my capability to address intricate problems and substantially contribute to your team's triumphs. My knowledge extends to the Software Development Life Cycle (SDLC) and Quality Assurance (QA) prerequisites, priming me to meet BMO's distinct requirements.

What particularly excites me about this opportunity is the prospect of immersing myself in the world of mainframe computing and languages. My demonstrated interest in mainframe technologies, encompassing COBOL,z/OS, DB2, CICS, MVS, and JCL, paired with my eagerness to acquire proficiency in High-Level Assembler (HLASM), positions me as a candidate brimming with enthusiasm, ready to embrace novel challenges. My strong aptitude for collaboration and multitasking, complemented by my robust leadership and communication competencies, have consistently facilitated productive interactions with business clients, fellow developers, and technical specialists throughout my career.

Enclosed, please find my resume, which provides a comprehensive overview of my professional journey. Thank you for considering my application. I look forward with great anticipation to the prospect of joining your esteemed team, actively playing a role in BMO's continued growth and success.

Sincerely,
Kevin Leander Louis

IBM 30XX/3090/ES 9000/z/OS.
Environments
Insurance, Retail, Banking,
Pharmaceutical
Tools
FILE-AID, QMF, DCLGEN, SDSF, SPUFI,
TSO/ISPF, FTP, XPEDITOR, PANVALET,
ABEND-AID, ENDEVOR, IBM TOAD,
IBM DEBUGGER, INNOWAKE

EDUCATION

Durham College
Oshawa, Ontario • Expected in
04/2024

Post graduate Diploma: Cloud
Computing

R.M.K Engineering College
Chennai, Tamil Nadu • 2013

*Bachelor of Mechanical
Engineering*

Jeevana School
Madurai, Tamil Nadu • 2009

PROFESSIONAL SUMMARY

Dynamic software development leader known for delivering successful application maintenance and platform migration projects, consistently ensuring customer satisfaction. Over the course of 10-year career, I've showcased expertise in hands-on development and project management, especially in large-scale enterprise initiatives within highly regulated settings. Extensive experience encompasses IBM Mainframes, with a strong command of COBOL, JCL, and DB2

WORK EXPERIENCE

Deloitte - Experience Senior Consultant
03/2022 - 07/2023

- Played a pivotal role in a mainframe modernization initiative, where we harnessed the capabilities of an innovative tool called InnoWake
- This tool facilitated the discovery and mining process, enabling us to meticulously discern the intricacies of the existing legacy system's application structure
- In doing so, we were able to systematically extract and document critical business rules, a process integral to the overarching modernization effort.

Wipro - Senior Project Engineer
03/2021 - 02/2022

- Analysed Java stored procedures and create business logic, input validation documents for the same
- Capitalized on extensive mainframe experience to lead the business analysis of this modernization project which created the complete application in Java/MongoDB/pivotal cloud from scratch keeping the existing mainframe-based application as a reference.

IBM - Senior Software Engineer
08/2017 - 03/2021

- To code COBOL programs from scratch for provider application that acts as a backbone for a leading healthcare provider in US.

Accenture - Senior Software Engineering Analyst
10/2013 - 08/2017

- Perform analysis based on the problem requests from clients
- Perform design based on the analysis done
- Perform development based on the design
- Perform Unit testing, UAT and document the Test results
- Coordinate with the QA for the acceptance testing
- Implement the developed code into production.
